Excerpt: . . . are estimated to demand a maximum of about 4000 horsepower for a period of 2V2 hours, whenever the dry dock is unwatered. The Balboa coalingplant demand, although not as severe as the larger Cristobal counterpart, is nevertheless of considerable magnitude. The normal load of the Balboa shops is comparable to an ordinary machine shop working a portion of the tools only, and the abnormal demand will occur when the shops are used for repair work in times of maximum activity. The motor-driven pumps for the water-works system of Balboa, Ancon and the City of Fig. 6. Gatun Substation. The building is of rectangular design to accommodate four 2000-kilowatt transformer equipments. Panama will demand a relatively constant supply ranging over many hours, similar to installations furnishing water to a diversified community. In addition to the above load there is a demand for general purposes, including...
